

Action Plan in response to the PPO Report into the death of Mr Lionel Newbon on 09 November 2024 at HMP Frankland

Rec No	Recommendation	Accepted / Not accepted	Response Action Taken / Planned	Responsible Owner and Organisation	Target Date
1	The Governor and the Head of Healthcare should review the disclosure of DNACPR instructions to custodial staff. Custodial staff should be aware of those who wish not to be resuscitated and have access to a DNACPR instruction form (which can have confidential medical information redacted).	Accepted	<p>Following discussions between the Head of Safety and healthcare managers it has been confirmed that healthcare is creating a complex care register to capture information about prisoners who have a DNACPR instruction form in place. The register will be digital and maintained by healthcare who will review it on a monthly basis or sooner if there is a change in circumstances. When the register is updated, all changes will be communicated promptly to the relevant areas.</p> <p>Healthcare will inform relevant managers and staff of DNACPRs that are currently in place, although no specific medical details will be shared, and a list will be provided to each wing with the details of prisoners located on the wing who have a DNACPR in place. The wing will keep the DNACPR list in a suitable place that can be easily referenced by staff but not in sight of prisoners. The position of the list may differ depending on the layout of the wing.</p>	<p>Head of Safer Custody HMPPS</p> <p>Head of Healthcare Spectrum CIC</p>	July 2025

			<p>As the prison has 24 hour healthcare cover, healthcare staff responding to an incident can confirm if there is a DNACPR in place.</p> <p>A notice to staff will be produced to advise all staff of the process and to make them aware of the DNACPR lists.</p>
