## STC Rainsbrook 2020

### Comparison of survey responses between sub-populations of children

In this table responses of children in self-identified racial minority groups are compared with those of white children.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

Number of completed questionnaires returned

| Racial Minority | White |
|-----------------|-------|
| 13              | 19    |

| DEMOGRAPHICS AND OTHER BACKGROUND INFORMATION |                                                                               |      |      |
|-----------------------------------------------|-------------------------------------------------------------------------------|------|------|
| 2                                             | Are you under 15 years of age?                                                | 8%   | 11%  |
|                                               | Are you aged 18 or over?                                                      | 0%   | 6%   |
| 3                                             | Are you female?                                                               | 39%  | 21%  |
| 4                                             | Do you self-identify in a racial minority group (black, Asian, mixed, other)? |      |      |
| 5                                             | Are you from a Traveller community?                                           | 8%   | 16%  |

## STC Rainsbrook 2020

### Comparison of survey responses between sub-populations of children

In this table responses of children in self-identified racial minority groups are compared with those of white children.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

|                                                            |                                                                                     | Racial Minority | White |
|------------------------------------------------------------|-------------------------------------------------------------------------------------|-----------------|-------|
| Number of completed questionnaires returned                |                                                                                     | 13              | 19    |

### Comparison of survey responses between sub-populations of children

In this table responses of children who reported that they had mental health problems compared with those who did not.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

|                                             | Mental health problems | No mental health problems |
|---------------------------------------------|------------------------|---------------------------|
| Number of completed questionnaires returned | 14                     | 16                        |

| DEMOGRAPHICS AND OTHER BACKGROUND INFORMATION |                                                                               |      |     |
|-----------------------------------------------|-------------------------------------------------------------------------------|------|-----|
| 2                                             | Are you under 15 years of age?                                                | 23%  | 0%  |

## Comparison of survey responses between sub-populations of children

In this table responses of children who reported that they had mental health problems compared with those who did not.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

|                                             |                                                                                     | Mental health problems | No mental health problems |
|---------------------------------------------|-------------------------------------------------------------------------------------|------------------------|---------------------------|
| Number of completed questionnaires returned |                                                                                     | 14                     | 16                        |
| <b>PURPOSEFUL ACTIVITY</b>                  |                                                                                     |                        |                           |
| 11                                          | Are you doing any of the following activities at the moment:                        |                        |                           |

## STC Rainsbrook 2020

### Comparison of survey responses between sub-populations of children

In this table responses of children who reported that they had mental health problems compared with those who did not.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

|                                             |                                                                                         | Mental health problems | No mental health problems |
|---------------------------------------------|-----------------------------------------------------------------------------------------|------------------------|---------------------------|
| Number of completed questionnaires returned |                                                                                         | 14                     | 16                        |
| <b>SAFETY AND SECURITY</b>                  |                                                                                         |                        |                           |
| 17                                          | Have other young people here ever done any of the following to you?                     |                        |                           |
|                                             | Verbal abuse?                                                                           | 67%                    | 36%                       |

## STC Rainsbrook 2020

### Comparison of survey responses between sub-populations of children

In this table responses of children who had been in local authority care are compared with responses of those who had not been in local authority care.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

Number of completed questionnaires returned returned

| Have been in local authority care | Have not been in local authority care |
|-----------------------------------|---------------------------------------|
| 18                                | 15                                    |

| DEMOGRAPHICS AND OTHER BACKGROUND INFORMATION |                                                                               |      |     |

|                                                      | Not doing any of these activities                                           | 12%                               | 8%                                    |
| 12                                                   | Have you been provided with an in-cell activity pack?                       | 20%                               | 39%                                   |

## STC Rainsbrook 2020

### Comparison of survey responses between sub-populations of children

In this table responses of children who had been in local authority care are compared with responses of those who had not been in local authority care.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

|  |                                                                                         |
|--|-----------------------------------------------------------------------------------------|
|  | Green shading shows results that are significantly more positive than the comparator    |
|  | Blue shading shows results that are significantly more negative than the comparator     |
|  | Orange shading shows significant differences in demographics and background information |
|  | No shading means that differences are not significant and may have occurred by chance   |
|  | Grey shading indicates that we have no valid data for this question                     |

|                                             |                                                                                     | Have been in local authority care | Have not been in local authority care |
|---------------------------------------------|-------------------------------------------------------------------------------------|-----------------------------------|---------------------------------------|
| Number of completed questionnaires returned |                                                                                     | 18                                | 15                                    |
|                                             | For those who were provided with an in-cell activity pack:                          |                                   |                                       |
|                                             | Are these packs helpful?                                                            | 100%                              | 40%                                   |
| <b>TIME OUT OF ROOM</b>                     |                                                                                     |                                   |                                       |
| 13                                          | Do you usually spend 2 hours or more out of your room each day?                     | 94%                               | 86%                                   |
| 14                                          | Can you spend time outside in the fresh air most days?                              | 77%                               | 57%                                   |
| <b>CONTACT WITH THE OUTSIDE WORLD</b>       |                                                                                     |                                   |                                       |
| 15                                          | Has anyone here helped you to keep in touch with your family and friends?           | 75%                               | 71%                                   |
|                                             | Are you able to use the phone every day, if you have credit?                        | 93%                               | 100%                                  |
| 16                                          | Have you been able to see your family and friends more than once in the last month: |                                   |                                       |

# STC Rainsbrook 2020

## Comparison of survey responses between sub-populations of children

In this table responses of children who had been in local authority care are compared with responses of those who had not been in local authority care.

Shading is used to indicate statistical significance (less than 1% probability that the difference is due to chance), as follows:

- Green shading shows results that are significantly more positive than the comparator
- Blue shading shows results that are significantly more negative than the comparator
- Orange shading shows significant differences in demographics and background information
- No shading means that differences are not significant and may have occurred by chance
- Grey shading indicates that we have no valid data for this question
