Dear Colleague,

Mr D1914 DPA DPA
DPA

Your patient had an angiogram on 06/10/2016 and this was reported as below:

Findings:

(Lesion) De-novo lesion in Proximal LAD, 100% stenosis completely occluded .
Collateral from Region Right PDA to Distal LAD.

(Lesion) De-novo lesion in LMS, 75-94% stenosis with full perfusion, normal flow.

(Lesion) De-novo lesion in Region OM1, 95-99% stenosis with penetration of entire artery but delayed flow.

Diagnosis:

Coronary disease-Left main stem

Coronary disease-Circumflex

Coronary disease-Left anterior descending artery

Treatment Plan: he needs CABG after carotid dopplers, CXR, Echo, lung function

Booked into Mr Bahrami/ Mr Gaer clinic

Yours sincerely

Dr Piers Clifford
Consultant Cardiologist
